- Fluid-filled system for temperature stability
- Oil filling meets FDA requirements CFR 178.3620 and CFR 172.878
- Oil filling volume: W30 (30mm³); W31-W32-W33 (40mm³)
- 1/2-20UNF, M18x1.5, standard threads; other types available on request
- Standard diaphragm is a 17-7 PH stainless steel GTP coating corrugated diaphragm

GTP (advanced protection)

Coating with high resistance against corrosion, abrasion and high temperature

The W3 series of Gefran, are pressure transducers for using in High temperature environment.

The main characteristic of this series is the capability to read temperature of the media up to 315°C.

The constructive principle is based on the hydraulic trasmission of the pressure.

The fluid-filled system assures the temperature stability. The phisical measure is transformed in a electrical measure by means the strain-gauge technology.
